

Information on „REACH“

Information on Regulation ‘(EC) No 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (Registration, Evaluation, Authorisation and Restriction of Chemicals - REACH).

The REACH Regulation stipulates that all chemical substances that are produced in quantities of more than one ton per year may only be marketed in the European Union if they have been pre-registered or registered beforehand.

VOGT GmbH does not produce any substances within the meaning of this regulation. We only sell products which, according to TITLE I, CHAPTER 2, Article 3 (Definitions), are ‘articles’ in the sense of chemical law and are not defined as ‘substances’ or ‘preparations’. According to the provisions of the REACH Regulation, VOGT is a ‘downstream user’ and is not subject to the registration obligations.

Furthermore, we can confirm that the products manufactured by VOGT do not contain any substances in concentrations above the permitted limits which have been published by ‘ECHA’ (European Chemicals) in the so-called candidate list as ‘Substances of Very High Concern’ (Substance of Very High Concern = SVHC).

In our own interest and in the interest of our customers, VOGT keeps a register of hazardous substances in which the annual quantities of chemicals and hazardous substances used are recorded and continuously updated.

If you have any questions, please do not hesitate to contact us.
